Meeting notes

- Run Mann Whitney
in R code

Parser flow chart

- separately
- look at saved pics from ~~exam~~
- added a legend
- "calling", "calculating"
- entity: parser & doc string.
- all mentioned entity ~~are se nature~~
are mentioned once
- ML tool, processes to be
integrated into parse flowchart
- step 5 is where \nearrow this happens
- 6 step is null & its apart
- doc string & parser run parallel
- retrieving preference of content
- mapping of. Content based on
exposure & preference

customizing
is "replaced"
w/ "push"

~~Bartholomew~~

- Obama's first speech
- Martin Luther King
- Our iPhone speech.
- K21?
- Mentorship tie it into the research.
- if you look around this happens all the time ... if you look ML is there.
- ML
- Mann Whitney
- how we would want to adjust
→ id resources which are useful
to generate APIs
- github copilot
