

upload my tasks list to every <sup>corresponding</sup> date

Elim { White board image:  
step 4: - upvote & downvote  
- duration of membership  
step 5: experiment w diff K values

Next steps:

- add the tables

- all uses  $\rightarrow$  possibly not in dashng \* it could be advance, beginner, or none

- link to youtube videos

- Add beginner

- add advanced.

- original

drop down

- enhance original: like videos

- Readability scores for advance original

- alter beginner & advance accordingly

- clustering & classifying

unsupervisor

supervisor

- mannwhitney test

Milroy

\* if an API descr. suitable for advance or beginner user

w.r.t the readability score?

\* first step to check the stat diff.

between readability

score & beginner tutorial. s using group means test like mannwhitney
